Mission Statement

“ Create a **User Interface**
so that OpenOffice.org becomes
the users' choice not
only out of **need** but also out of
desire”

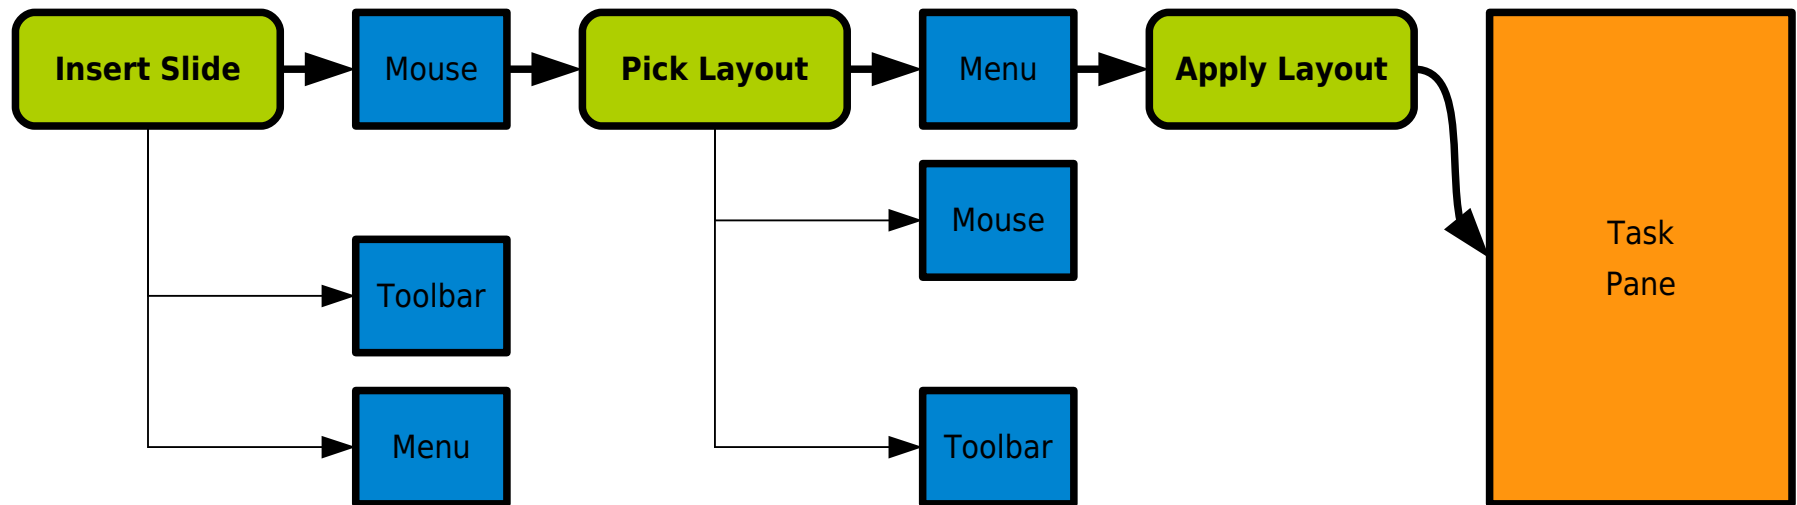

Goal Statement

... to know and to understand our users as they are,
and to help them accomplish what they want to,
by providing efficient access to valuable functionality through a desirable user interface.

Working with Slide Layouts (Future)

Working with Slide Layouts (Future)

Working with Slide Layouts (Future)

- The benefits
 - > Spend less time worrying about layouts
 - Assign with less clicks
 - Assign whenever you are ready to
 - Assign faster due to less choice but more flexibility

Normal	Outline	Notes	Handout	Slide Sorter
--------	---------	-------	---------	--------------

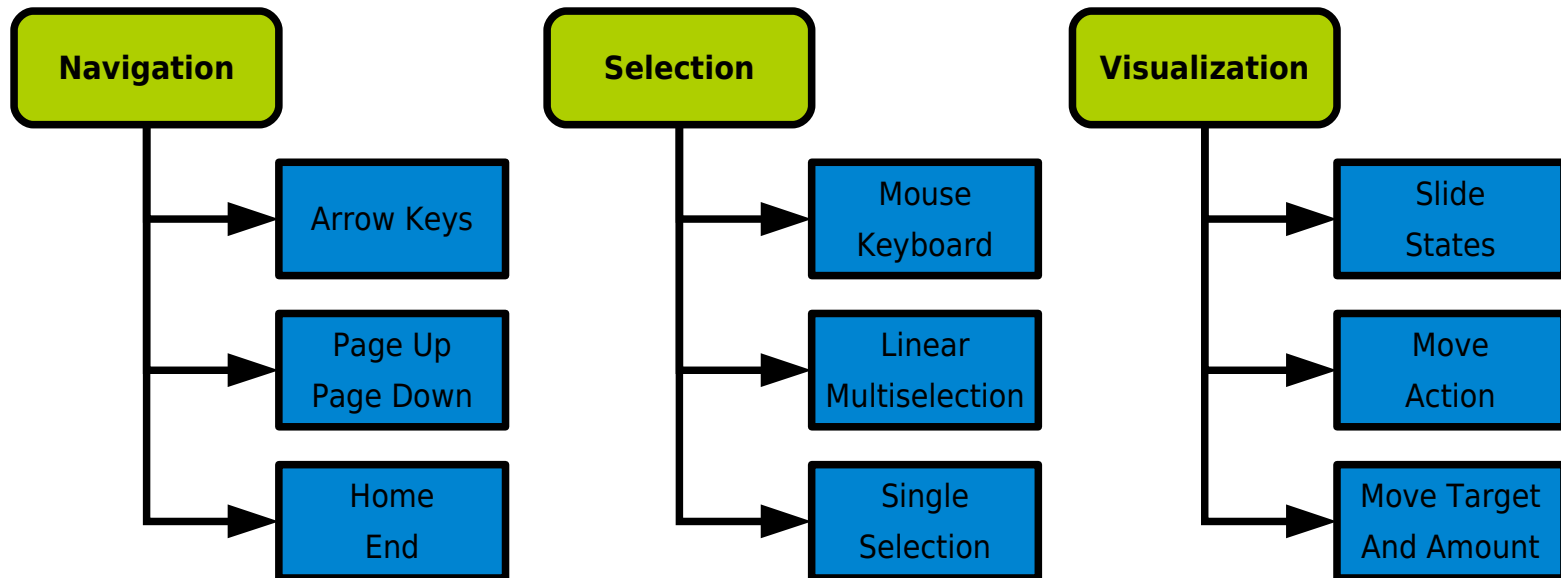

[illegible]

1

Working with Slides (Now)

- Navigating through a presentation
 - > Restricted to very few options
 - > Different to most other applications
- Selecting, moving and hiding slides
 - > Visual orientation is not well supported
 - > Selection behavior is little task oriented
- Most commands require search in the UI
 - > Where is the function located? (Dup. Slides)
 - > What happens when I do XYZ? (Hiding Slides)

Working with Slides (Future)

Working with Slides (Future)

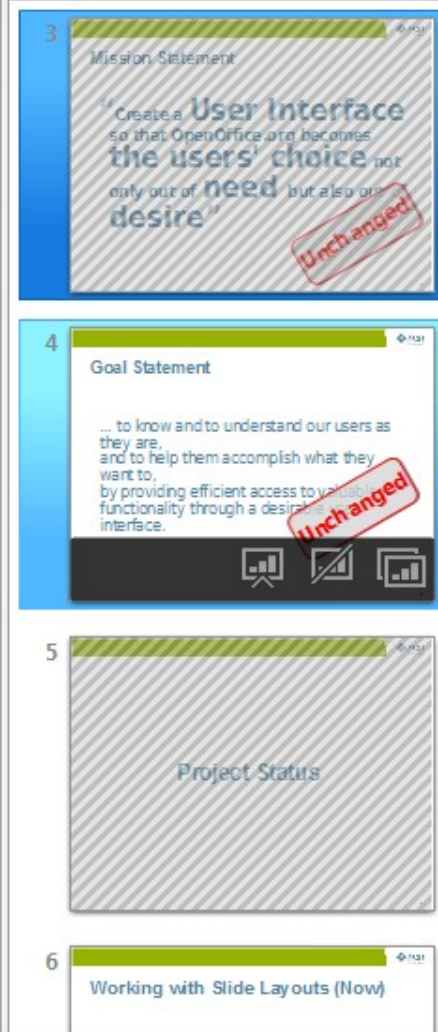

- The benefits
 - > Spend less time on *trial & error* in the UI
 - Faster orientation and more flexible navigation
 - Faster anticipation of available actions
 - Faster anticipation of consequence of actions
